EJ CAUBAT

SOFTWARE ENGINEER | ENTERPRISE APPLICATION DEVELOPER

Central Luzon, Philippines | 0949 359 7878 | ejcaubat14.com | LinkedIn: www.linkedin.com/in/ejcaubat | Portfolio: https://krazydec.github.io/ejcaubat/

PROFESSIONAL SUMMARY

Software engineer and Packaged App Development Analyst with 7+ years of progressive experience building, enhancing, and supporting enterprise, banking, HRIS, ERP, POS, and e-commerce applications. Strong background in C#, .NET, ASP.NET MVC, REST APIs, JavaScript, AngularJS, TypeScript, Python, Oracle SQL, Microsoft SQL Server, Postman, Azure DevOps, CI/CD, and production support. Experienced in backend and API logic, stored procedures, code refactoring, regression testing, release support, issue resolution, and technical documentation across Agile and cross-functional teams.

CORE TECHNICAL SKILLS

Languages	C#, Python, Java, JavaScript, TypeScript, SQL, HTML, CSS
Frameworks	ASP.NET, .NET, ASP.NET MVC, AngularJS, JavaWeb, Magento, Wix
Databases	Oracle SQL, Microsoft SQL Server, SSMS, stored procedures
APIs & Testing	REST APIs, API integration, Postman, regression testing, UAT support
DevOps & Tools	Azure DevOps, Azure DevOps Boards, CI/CD, Git, GitHub, Jira, Visual Studio, VS Code, Eclipse, PuTTY, WinSCP, Tortoise
Enterprise Systems	Core banking, payroll processing, HRIS, ESS, ERP, POS, employee portals, ServiceNow
AI & Methods	Artificial Intelligence, AI agents, workflow integration, GitHub Copilot, Agile, Scrum, SDLC, code reviews

PROFESSIONAL EXPERIENCE

Packaged App Development Analyst | Accenture | Oct 2024 - Present | Metro Manila

- Design and implement backend features and API logic using C# and .NET for enterprise applications.
- Test APIs with Postman and support CI/CD deployments across DEV, UAT, and PROD through Azure DevOps.
- Handle version-specific requests and conditional workflow execution while refactoring code for reusability, maintainability, and coding-standards compliance.
- Collaborate with QA and cross-functional teams on code reviews, technical walkthroughs, testing, and issue resolution.
- Provide coding solutions and ServiceNow ticket support for the Employee Portal.
- Track development tasks, testing progress, and operational support through Azure DevOps Boards.

Programmer / Consultant at China Bank Corporation | Vertere Global Solutions, Inc. | Sep 2022 - Sep 2024 | Makati

- Enhanced Finacle Core Banking Solution tellering transactions supporting nationwide banking operations.
- Managed Oracle stored procedures and developed Python and JavaScript solutions to improve existing system efficiency.
- Supported Straight Through Processing for corporate and China Bank payroll accounts using ASP.NET, Microsoft SQL Server, SSMS, Visual Studio, and Tortoise.
- Managed work items and delivery coordination through Jira, PuTTY, and WinSCP.

Programmer | FurtherEdge | Jan 2020 - Aug 2022 | Pasig

- Developed an upgraded HRIS and Employee Self-Service platform using AngularJS, TypeScript, HTML, CSS, C# MVC, and Microsoft SQL Server.
- Delivered client support, issue resolution, and client-specific customizations for the flagship HRIS and ESS product.
- Managed stored procedures and validated APIs using Postman; used Microsoft Azure for source and version management.

Software Engineer / Client Support | Hilsoft Inc. | May 2019 - Dec 2019 | Mandaluyong

- Supported ERP and POS software products and conducted on-site consultancy for client-specific requirements.
- Maintained JavaWeb ERP components using Java, EAR files, and Eclipse.
- Supported C# desktop POS applications and tested APIs using Postman.
- Managed stored procedures and investigated software issues through direct client support.

Web Developer Intern | K. Grace Consulting Group Inc. | Dec 2018 - Mar 2019 | Makati

- Completed a 500-hour internship focused on building e-commerce websites with Magento and Wix.
- Applied programming fundamentals, APIs, MVC patterns, backend development, and clean-coding practices in an industry environment.

SELECTED PROJECTS

ReferralHub PH: Built a referral-focused web platform prototype using Next.js, Supabase, authentication, database tables, row-level security, job-posting workflows, and resume-improvement capabilities.
Enterprise Application Support: Produced impact analyses, regression packs, Azure DevOps test cases, release documentation, technical guides, and knowledge-transfer materials for business-critical applications and RPA tools.
AI-Assisted Development: Used GitHub Copilot and generative AI for code generation, debugging, refactoring, documentation, and technical learning.

CERTIFICATIONS

GitHub Foundations | Responsible Use of AI | CCSP 2019: Application Development & Security | CCSP 2022: Cloud Security Concepts & Design Principles | Agile Project Planning

EDUCATION

Bachelor of Science in Information Technology | Polytechnic University of the Philippines | Jun 2015 - Apr 2019
